

Basix:Mobile provides seamless mobile integration to your Basix solution and can be used for any number of mobile application requirements.

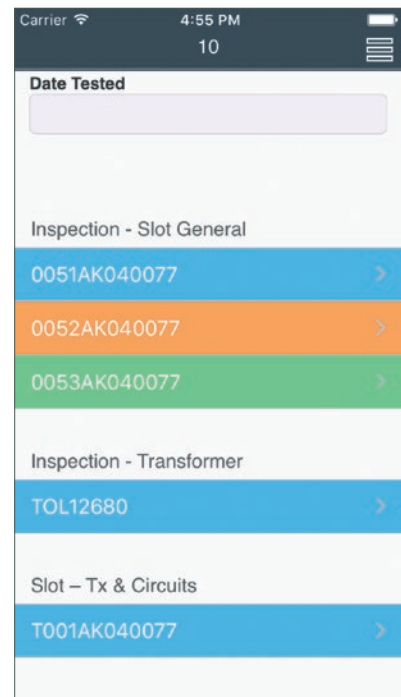

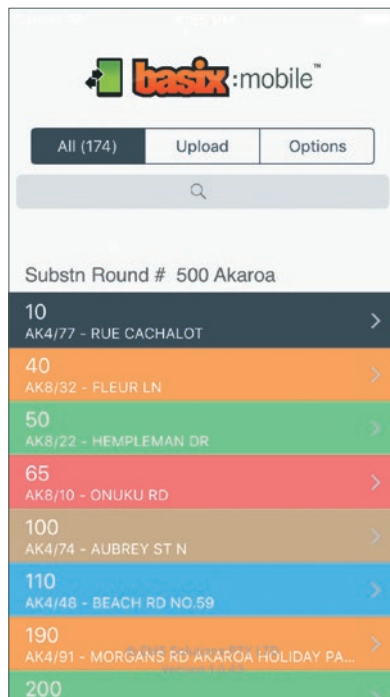

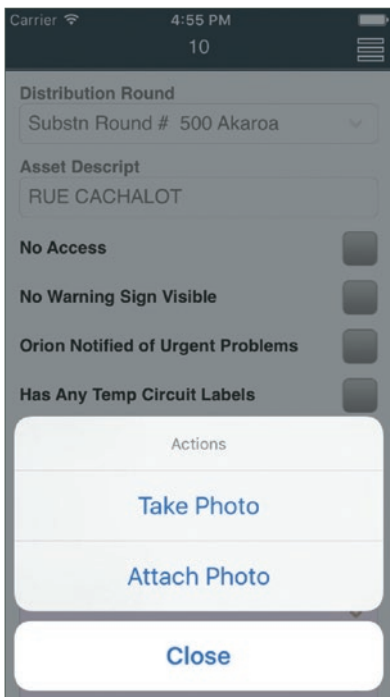

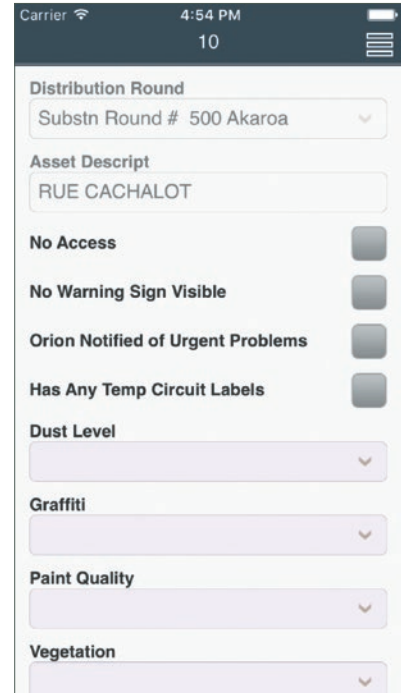

Basix:Mobile provides seamless mobile integration to your Basix solution and can be used for any number of mobile application requirements. **Basix:Mobile** can also be used independently of a Basix solution and can be integrated with other business applications to provide mobile functions if required (conditions apply).

EMS has **Basix:Mobile** solutions for Substation MDI inspections (Basix:Electricity Manager) and Tenancy Inspections (Basix:Housing Manager). EMS can also create custom mobile apps to suit specific requirements using our innovative Basix:Mobile technology.

Key features of **Basix:Mobile**:

- Export inspection packs/required data from Basix solution directly to specific mobile users.
- Mobile users can edit or add data in the field, take photos and attach various files, then upload one or multiple records directly back to Basix when ready.
- GPS functionality available to assist with locations.
- Licensed per user. Each user can run multiple **Basix:Mobile** apps for each licence.
- **Basix:Mobile** currently runs on Apple iOS.

If you would like to know more about **Basix:Mobile** then contact us via www.ems-solutions.com.au or sales@ems-solutions.com.au
